Pioneers in Asia

As the first skyscraper hotel in Japan, we met the challenge of successfully constructing this kind of high-rise tower back in 1971. During the first six months following the hotel's opening, over one million people came to the top floor for a view of the urban landscape from an unprecedented height. The Keio Plaza Hotel Tokyo continues to be a pioneer in

the industry, creating and establishing new services and introducing products, which include a dedicated Japanese sake bar, karaoke room, onsite wedding chapel, universal-designed guest rooms for the physically challenged, and so much more. This spirit of discovery continues to define the legacy of the Keio Plaza Hotel Tokyo.
